Professional Summary

I'm a developer based in Bangkok, Thailand with experience in building web applications and interactive experiences. My passions lie in developing application that solve real-world business requirements and giving the players unique and memorable experience. I'm currently exploring Python and Rust programming languages to expand my technical skills—particularly for AI integration and high-concurrency API development.

Work History

Full Stack Developer

Feyverly Co., Ltd. | Aug 2024 - Present

- Designed optimized SQL database schemas with indexing and normalization for query performance.
- Optimized API performance using asynchronous programming, Redis caching, distributed locks, and rate limiting.
- Collaborated with cross-functional teams to develop and maintain an enterprise CRM platform.
- Developed a customizable gamification application integrated with the CRM platform.
- Built web-based games for brand partnerships, reaching 100,000+ active users and distributing promotional vouchers as rewards.
- Developed an ERP system to streamline clinic operations, inventory management, and supply chain workflows.

Intern, Game Developer

Sunny Syrup Studio Co., Ltd. | May 2024 - Aug 2024

- Prototyped proof-of-concept game mechanics for Not Monday Cafe.
- Developed custom Unity editor tools in collaboration with senior developers to accelerate development cycles.
- Integrated animations and UI elements into the game, working closely with artists and designers.
